Seasoned Industry Expert Joins Management Team

Harco Metal Products Announces New Quality Manger

TEMPE, Ariz. – February 8, 2010 – Harco Metal Products (Harco), an industry leader in tube fabrication, systems integration, and seamless, cost effective manufacturing, announced today the appointment of Polonie Gomez as Quality Manager at their Tempe, Arizona facility.

Gomez brings high-level experience in Total Quality Management, Statistical Process Control, Root Cause and Corrective Action, Six Sigma, and PFMEA to the Harco team. Additionally, he has a strong quality background in the area of AS9000 and AS9100 principles, guiding several major companies to certification in both ISO and AS.

“Mr. Gomez’s 20 years of experience in safety and quality assurance is a valuable asset to Harco,” said Jay Hall, Harco President and Founder. “We look forward to utilizing his experience and expertise as a growth catalyst as we continue to become a leader in our industry,” Hall continued.

At Harco, Gomez will capitalize on his strength in lean manufacturing, statistical process control, and preventative action to further improve manufacturing efforts in support of customer critical requirements.
